Classio SMS

October 2026 edition
classio.jp

Connect departments around the student.

Bring admissions, academic affairs, learning, support, finance, careers, and alumni information together by student, organization, and academic year.

01 Recruitment and admission

Prospects, events, online applications, interviews, decisions, and enrollment.

Admissions CRM

Online applications

Interviews and decisions

Invites and bulk registration

02 Student and academic operations

Manage students, affiliations, schedules, attendance, grades, fees, and certificates.

Student records

Attendance and schedules

Grades and qualifications

Fees and certificates

03 Teaching and learning

Support syllabi, assignments, assessment, online learning, and correspondence programs.

LMS and assignments

Syllabi

Learning outcomes

Online learning

04 Student support and outcomes

Connect counseling, international support, practical training, portfolios, jobs, and alumni.

International support

Practical training

Portfolios

Careers and alumni

05 Operations and governance

Provide configuration, permissions, approvals, audit, reports, and integrations as shared infrastructure.

Roles and permissions

Approvals

Audit and reports

Integrations and operations

Design principles

Move information forward

Connect departmental handoffs through both data and assigned work.

Govern important decisions

Apply controls to grades, admissions, fees, and lifecycle changes.

Use the institution's terminology

Adapt names for students, departments, classes, and other entities.

02 · PRICING

Clear pricing for how schools, juku and K-12 actually compare.

Juku and lesson schools from ¥7,800/month per classroom (before tax); institutions from ¥19,800/month. No per-seat charges for staff or guardian accounts.

Colleges and language schools

Starter ¥19,800 /month, before tax 100 students and 1 campus included	Standard ¥39,800 /month, before tax 200 students and 2 campuses included	Professional ¥69,800 /month, before tax 300 students and 3 campuses included	Enterprise ¥148,000~ /month, before tax 1,000 students and 5 campuses included
--	---	---	---

Juku, lesson schools and after-school care

School Light ¥7,800 per month before tax, per classroom 1 classroom and 80 students included	School Standard ¥14,800 per month before tax, per classroom 1 classroom and 200 students included
---	--

Private K-12

K-12 ¥39,800 per month before tax (up to 150 students) Extra student ¥240/month

Licence schools

Licence Light ¥14,800 per month, excl. tax, per school 60 active trainees included	Licence Standard ¥49,800 per month, excl. tax, per school 200 active trainees included	Licence Pro ¥89,800 per month, excl. tax, per school 450 active trainees included
---	---	--

- 10% off recurring fees with annual prepayment; domestic bank transfer supported
- 30-day free trial, no credit card required, no auto-charge
- Recurring card payments and online tuition settlement are offered after target-environment checks
- K-12 is priced per student (¥39,800/month up to 150 students, then ¥240 each), by quote until a first school has accepted the statutory reports
- Operators of several schools can receive one qualified invoice listing every school (family tuition stays per school)

All prices are monthly and exclude tax. See classio.jp/pricing for current prices and conditions.

Build protection for school data into everyday operations.

Control not only who can sign in, but what they can see and do within an exact organization and campus context.

Tenant and campus isolation

Verify organization and campus context on the server and prevent access to out-of-scope data.

Roles, grants, and denials

Combine base roles with additional grants and explicit denials, with denials taking precedence.

Approval and separation of duties

Require independent approval for important admission, grade, finance, and operational actions.

Audit evidence

Record important changes with the user, organization, target, and meaningful change detail.

Sessions and suspension

Reflect membership and organization state in sessions and revoke access when needed.

Files and integrations

Control organization-scoped storage, signed access, scan state, and integration allowlists.

External integrations are set up and verified before we confirm them.

LINE, payments, storage, cloud, and official documents are not considered complete just because the capability exists. We configure them to your environment and operations, then confirm behaviour and records before providing them.

- ✓ Authentication and access testing in the target environment
- ✓ Storage, backup, and recovery acceptance
- ✓ Real delivery tests for LINE, payments, and integrations
- ✓ Institutional review of official documents and retention

04 · IMPLEMENTATION

Roll out in stages around the way your institution works.

Review existing ledgers, systems, departments, and academic-year timing to reduce implementation risk.

01	Discovery Review workflows, users, ledgers, existing systems, priorities, and timing.	Deliverable Scope and priorities
02	Operating design Define organizations, campuses, roles, terminology, approvals, notifications, and retention.	Deliverable Operating and access design
03	Configuration and migration Import departments, users, students, classes, and required history with verification.	Deliverable Configured environment and migration result
04	Pilot operations Run representative workflows with real user roles and adjust settings and procedures.	Deliverable Acceptance result and issue list
05	Go-live and adoption Support launch, review operations, and define the next scope.	Deliverable Go-live and improvement plan

05 · GETTING STARTED

Start with a free trial or an online consultation.

- 30-day free trial (no credit card, no automatic charges)
- Online consultation: an estimate based on your size and the work in scope
- Brochure requests and enquiries: classio.jp/contact
